INSTRUCTIONS TO CONTRIBUTORS

Members of the Society and others are invited to contribute papers on original subjects of geological interest, especially those dealing with the north of England. Papers intended for publication in the Proceedings should normally follow the recommendations put forward by the Geological Society of London in their pamphlet "Notes on the preparation of papers for publication in the Quarterly Journal," which may be obtained on application to the Assistant Secretary, The Geological Society, Burlington House, London, W.1 (price to non-fellows, one shilling). Such papers should be accompanied by a summary of not more than 200 words in length. Typescripts should be sent either to the Editor or to the Secretary.

Discussion: Members contributing to the discussion of papers read before the Society may submit an abstract of their remarks for publication in the Proceedings. Such contributions should be sent to the Editor immediately after the meeting.
