PROCEEDINGS OF THE
Yorkshire Geological Society

VOLUME 58 PART 4 NOVEMBER 2011

CONTENTS

A. Snelling, D. Bates and J. Zalasiewicz
Graptolite studies in honour of Barrie Rickards (1938–2009): an introduction
page 207

D. Bates, A. Kozłowska, D. Chmielarz and A. Lenz
Excessive thickening of the cortical layer in graptolites
211

R. A. Fortey
A critical graptolite correlation into the Lower Ordovician of Gondwana
223

Biogeography and Mass Extinction: Extirpation and re-invasion of Normalograptus species (Graptolitina) in the
Late Ordovician Palaeotropics
227

M. P. Howe
GrapEl – a simple spreadsheet application for managing and disseminating graptolite biozonal range chart data
247

J. Loxton, M. J. Melchin, C. E. Mitchell and S. J. H. Senior
Ontogeny and Autonomy of the Graptolite Genus Appendixcograptus (Li and Li, 1985)
253

J. Maletz
Scandinavian Isograptids (Graptolitina, Isograptidae): Biostratigraphy and Taxonomy
267

M. J. Melchin, C. E. Mitchell, A. Naczk-Cameron, J. X. Fan and J. Loxton
Phylogeny and Adaptive Radiation of the Neograptina (Graptolida) During the Hirnantian Mass Extinction and
Silurian Recovery
281

A. A. Cullum and D. K. Loydel
The Rhuddanian/Aeronian transition in the Rheidol Gorge, mid Wales
261

L. A. Muir
An unusual specimen of Glyptograptus from Dob’s Linn (Southern Uplands, Scotland), and a discussion of graptolite
teratomorphies
239

J. Maletz
Deflexed didymograptids from the Lower Ordovician Skiddaw Group of northern England
291

P. M. Sadler, R. A. Cooper and M. J. Melchin
Sequencing the graptoloid clade: building a global diversity curve from local range charts, regional composites and
global time-lines
329

A. A. Cullum and D. K. Loydel
The evolutionary lineage of Petalolithus to Cephalograptus: evidence from Coalpit Bay, Northern Ireland
345

J. Zalasiewicz, C. Russell, A. Snelling and M. Williams
The systematic relationship of the monograptid species acinaces Törnquist, 1899 and rhodolensis Jones, 1909
351

Abstracted and/or indexed in Current Contents, GeoArchive, Geobase, GeoRef, Geological Abstracts, Mineralogical Abstracts,
Research Alert and Science Citation Index Expanded (SCIE)

Typeset and Printed on acid-free paper at Henry Ling Ltd., at the Dorset Press, Dorchester, Dorset DT1 1HD, UK
Instruction to authors

The Proceedings of the Yorkshire Geological Society is a biannual publication that caters for original research papers on all aspects of geology. Emphasis is placed on (i) papers relating to the geology of the north of England (but including aspects of more than local interest) and (ii) papers of general geological interest. Papers should be between 3000 and 5000 words in length, including references (a full printed page consists of c. 1000 words). Longer contributions should not be submitted without prior consultation with the Editors. Review papers are normally published by invitation only, but ideas for a review paper may be submitted to the Editors for assessment by the Publications Committee.

1. SUBMISSION OF PAPERS

Papers are welcome from Society members and non-members alike. They are accepted on the understanding that they have not been published elsewhere and authors are asked to assign copyright to the Yorkshire Geological Society. Three complete copies of papers should be submitted to the Editors, Proceedings of the Yorkshire Geological Society, Geological Society Publishing House, Unit 7, Bransmill Enterprise Centre, Bransmill Lane, Bath BA1 3JN, UK. The Proceedings is now set from disk and authors should consult the ‘Notes for electronic text preparation’ available from the Production Editor. Authors may also find it helpful to consult the Royal Society’s booklet, General Notes on the Preparation of Scientific Papers (revised edn, 1974).

Typescripts should be in their final form, and should be arranged according to the layout used in the latest issue of the Proceedings. Typescripts that deviate excessively from the standard layout will be returned to the authors for modification. Copies of all illustrations should be at anticipated final publication size and of sufficient quality to allow proper assessment of their composition and reproducibility. Copies of half-tone tins must be photograph prints not photocopies. One set of camera-ready photographic prints of all line drawings should be submitted with the revised manuscript; these should be at final publication size (see 2.4). Originals of line drawings will be required only in exceptional circumstances. References are appointed to assist the Editors, and the author will be informed of the decisions reached. In multi-authored works, correspondence will be with the first-named author unless otherwise arranged. Proofs will be sent direct to the author who must read and return these, retaining them for the Editors. Prompt attention to proofs is essential.

2. PREPARATION OF PAPERS

2.1. Typescripts

Typescripts should be double-spaced throughout (including references and figure captions), with each page numbered serially; A4 size is preferred. The typescripts should be arranged as follows:

1. Title, which should be concise yet informative.
2. Name(s) and full postal address(es) of author(s).
3. Summary. This should not exceed 250 words and should be a self-contained summary and not a mere statement of the main achievements of the paper (without reference) and not a mere statement of the scope and contents of the paper.
4. Main text. This should be organised according to the system of headings described in section 2.2.
5. Appendices, if necessary.
6. References (see section 2.6).
7. Embed all illustrations in the text, together with its caption.
8. List of figure captions.

2.2. Headings

Four grades of headings are normally used in the Proceedings:

1. FIRST-ORDER HEADING

1.1. Second-order heading. Text follows on next line.
1.1.1. Third-order heading. Text follows on next line.

Fourth-order headings. Text follows on same line.

In certain circumstances (e.g. where there are frequent short sections) it may be decided to vary this arrangement. The introduction section should not be numbered; the heading ‘Introduction’ may, for clarity, be used on the typescript, although it will not be used in the printed paper. The first line of the first paragraph following each heading should begin at the left-hand margin (no indent).

2.3. Systematic palaeontology

The layout for palaeontological systematics should follow the conventions adopted by the Palaeontographical Society. Examples of house style may be found in previous volumes (from Vol. 45 onwards), e.g. Vol. 48, pp.124-136, 389-390, 447-452.

2.5. References

All references cited in text and captions must appear in the list, and vice versa. The accuracy of references is the responsibility of the authors. Within the text, the citation should be name and date: Young & Bird (1822) or (Young & Bird 1822) depending on context. Where the reference has three or more authors the text citation should be first-named author et al or Periodical titles should be quoted in full, and follow the wording on the title sheet. Where indication of the country or region of origin would assist in the identification of the publication, additional wording should be included: e.g. Journal of the Geological Society, London. Authors should be included in all foreign book and serial titles. Postpublication treatments should be quoted.

New lithostratigraphic terms should be rigorously defined to conform to the various codes for lithostratigraphic nomenclature. Examples of house style may be found in previous volumes (from Vol. 45 onwards), e.g. Vol. 48, pp.124-136, 389-390, 447-452.

2.4. Systematic lithostratigraphy

Any new lithostratigraphic terms should be rigorously defined to conform to the various codes for lithostratigraphic nomenclature. Examples of house style may be found in previous volumes (from Vol. 45 onwards), e.g. Vol. 48, pp.124-136, 389-390, 447-452.

3. OFFPRINTS

25 free offprints per paper are provided; additional copies may be purchased at the rate of £1.00 each.

Acknowledgement. Some figures published in the Proceedings display the National Grid, taken from the Ordnance Survey map with the permission of Her Majesty’s Stationary Office.
